

ASE GROUP INC

Your Security Solutions Specialists

SECURITY DESIGNED FOR YOUR HOME!

When it comes to your family's safety... Experience Counts!

Doing it right means your family should be worth more than just a "cookie cutter" approach to your home security. Let us show you how to get the most value ...and protection!

It typically all starts with a TV commercial, a mailing piece or the knowledge that someone you know just had their home broken into. It's a frightening thought!

The up side to this emotion is that it makes people respond with a desire to make their homes secure. All too often however the downside is many people simply "react" and purchase based upon what they feel is the "best offer". Meaning reacting to what the salesman is selling!

With over 25 years in the security business - working with large and small banks, credit unions, businesses ranging from Fortune 500 to mom and pop stores...ASE knows security.

More importantly, we know security equipment manufacturers! That means we won't come into your home and simply try to "sell you an off the shelf system!". Instead, we start by listening and understanding what your family and home needs. Then we'll provide you with a recommendation...based upon your requirements and budget!

Here's the foundation of how we work...

Think Outstanding Service!

We've always found the groundwork to our success rests with providing a preferred level of personal service coupled with a strong desire to always be responsive and attentive to our clients needs.

Think Custom

It all starts however, with gaining a sound understanding of what you'll need for your family and your home....and then having the experience and know-how to understand what system/equipment combinations will result in the best solution. That means we'll give careful thought to your surveillance, alarms, access process, modern control methods and monitoring...in order to assure the greatest safety.

Think Personal

Of course after everything is installed you'll still have the satisfaction of knowing you'll have

our full support 24/7...and have access to us if/when you may need us for any reason.

Since security is complicated and extremely important, at ASE Group Inc. the policy is always been to offer alternative technologies...that is... to evaluate the needs at hand and provide the proper blend of security equipment and technology that will produce the strongest, smartest and safest system within the budget parameters allowed.

This means all the primary elements of the project will be evaluated very carefully including-

Alarm Systems- When it comes to alarms most people think primarily fire and burglar. Today there are many more options from which you can choose.

Thanks to modern technology, you can have a wide variety of alarm solutions in your own designed to provide you and your family protection from varied forms of personal harm which can include - burglar alarms, fire alarms and smoke detectors, medical alert systems, carbon monoxide detection units and more.

In addition, it is possible, to create a system that allows your pets cage to be opened automatically if an alarm goes off.

ASE GROUP INC

Plus, to inform the family it is possible to develop a variety of alerts like, lights going on, sounds like sirens going off and with a proper monitoring process the system can inform the authorities.

In addition, it can be programmed to inform the homeowner via their cellular phone and/or tablet.

Surveillance Systems - Let us help you determine the best methods and equipment needed to secure the inside and outside of your home.

ASE Group Inc. provides a variety of product and equipment options designed to assist you in implementing the proper surveillance solution for your home, along with the expertise to successfully handle all the installation requirements.

.Our systems include

- DVR's - Digital Video Recorders
- Cameras
- Collecting, retrieving reviewing and storing image capabilities
- Monitors
- Switching devices

And...a talented array of experts who are strictly dedicated to designing and installing the perfect system for your needs.

You'll also have a variety of options from an "alert" standpoint...both inside and outside your home. We can design a system that has your lights go on outside your home...as well as...providing you with remote access through your phone that allows you to turn the system on or off...and/or check to see if your children have gotten home safely from school.

Few things in life are as scary as the thought of having someone entering your house while the family is inside. Luckily there are a wide variety of ways to protect yourself and your loved ones under these circumstances. These include -

- Securing all the homes windows and doors
- Providing added protections like motion and sound detectors
- Alarm systems that let the homeowners know of the invasion as well as the authorities
- Creating a "panic" room environment that allows the homeowners a special location in the home that can lock them in and lock all others out

HIGH TECH **HIGH TOUCH**

Knowledge is power! In the security business that equates not only to having the expertise and experience to know how to get the job done... but knowing what equipment fits best in any given situation.

At ASE, we've been working with the largest and best security equipment companies across the country for many years. How that benefits our clients is simple...but not easy.

We're always amongst the first to learn of equipment changes, updates, improvements and technologies.

So, if your project can benefit by something that's just come into the market, you can count on the fact that not only will we know about it, we will inform you and recommend you install it if it is in your best interest to do so.

If you are in the market for a knowledgeable, dedicated security firm... Contact us today.
